

SKYPE DISCUSSION SESSION TRANSCRIPT

21.08.09

Host: Brett Young

Topic: What's hot in Exergaming and what's not.

Overview:

Conversation began with Sandra talking about her impressions of the virtualairguitar company's display, invitation only, for their freemotion technology game, Kung Fu, at GamesCon in Cologne.

Floyd Mueller describes his exertion over distance methods and gave some examples of their implementation.

Richard and Kevin spoke about the upcoming LIW conference in England, and Biray gave an overview of how R-Kaide was accepted at the IDEA conference.

Other discussions ran to general exergaming inceptions related to what's hot and what's not.

We had a major dropout half way through the session with some delay getting the conference reassembled. Some people had trouble hearing/talking in the conference room or joining the conference at all. Some technical hosting issues have to be worked out.

Unedited transcript below, other than being pieced back together, perhaps out of sync due to the mid conference dropout.
